

JIAJIE TAN

Database Administrator / Software Tester

PROFILE

A detail-oriented Software Engineering graduate with a strong interest in database administration and software testing. Through academic projects, I have gained hands-on experience in database design, SQL, MySQL, PHP, and web-based system development. I have also used Jira to prepare and manage test cases, perform functional testing, track issues, and verify data accuracy. I am eager to apply my technical skills, problem-solving ability, and attention to detail in Database Administrator or Software Tester role.

Relevant Project Experience

University of Greater Manchester

Sep 2025 - Jul 2026

Concert Pass Real-Name Access System in Malaysia

- Developed a real-name concert ticketing system to reduce scalping, fake tickets, and duplicated QR codes in Malaysia.
- Implemented IC/Passport verification, dynamic QR code access, and secure ticket ownership control.
- Built an official resale feature to allow ticket resale at the original price and improve fairness.
- Designed user and admin modules for concert browsing, seat booking, ticket management, and event management.
- Used Jira to prepare and manage test cases for registration, ticket booking, QR validation, resale process, and admin functions.

New Era Institute

Oct 2022 - Jul 2024

Condominium Facilities Online Booking System

- Developed an online booking system to manage condominium facility reservations and reduce double-booking issues.
- Designed database functions to store user bookings, facility details, payment records, and booking history.
- Implemented user features including booking cancellation, announcements, QR code generation, confirmation emails, and receipt viewing.
- Built admin functions to manage facilities, set prices, monitor booking records, and update announcements.
- Performed system testing to check booking flow, admin functions, email confirmation, and data accuracy.
