- Cantonese (Fluent)
- Malay (Basic)
- English (Basic)

### PROFILE

A detail-oriented database management professional proficient in HTML, CSS, and MySQL/SQL. With a passion for managing databases, I excel in optimizing data accuracy and efficiency. As a class monitor, I organized student submissions, ensured the integrity of reports using Turnitin, and assisted classmates with report uploads and technical issues. I am committed to teamwork and delivering high-quality results.

### WORK EXPERIENCE / DEVELOP PROJECT

#### Nanyang Cafe

2022 OCTOBER

Waiter

- Recognized the importance of teamwork, learning how effective collaboration among colleagues and management fosters a disciplined, efficient, and harmonious work environment. By working closely with team members to streamline service processes, I realized that open communication, mutual support, and shared responsibility are essential for handling high-pressure situations. This experience reinforced my belief that a well-coordinated team can significantly enhance overall customer satisfaction, ensuring that guests receive timely, accurate, and courteous service even during peak hours.

#### New Era Institute

2024 JULY - OCTOBER

Student

- Developed a comprehensive online booking system to solve issues with facility overbooking and double reservations in condominiums.
- The system allows both residents and non-residents to book facilities, with successful bookings generating QR codes for access and confirmation emails sent via Gmail, including payment receipts.
- Users can view announcements, cancel bookings, and track their booking history on the website, enhancing overall user experience and convenience.
- Admin functionalities include creating facilities, setting prices, managing booking records, and sending or deleting announcements.
